

Dial Down Climate Change **TALKING POINTS**

White House Comment Line:
(202) 456-1111

Hi, I'm calling from (city, state) to urge the President to support and strong and just global climate change agreements. I am a Unitarian Universalist, and my religious beliefs lead me to call for US and global policies that protect both the environment and the people most hurt by climate change. I'm asking for two things specifically:

- First, a commitment to reduce global greenhouse gas emissions to 350 parts per million; and
- Second, funding for international adaptation to help the most vulnerable people cope with the disastrous effects of climate change. Thank you.

For the latest UUA policy on climate change, see the 2006 Statement of Conscience "Threat of Global Warming/Climate Change." For more information, visit www.uua.org/socialjustice.
