* Ranked in custom endowment universe

** Net of investment management fees

*** Median returns for endowments between \$50 - \$200 million

Policy Index: Calculated by taking the target asset class weights times the return of the respective passive benchmark (re-balanced monthly). Measures the effectiveness of *Plan Structure*.

Allocation Index: Calculated by taking the actual asset class weights times the return of the respective passive benchmark. Measures the effectiveness of *deviating from target weights*.

Composite: Actual fund return. When compared to the allocation index, it measures the effectiveness of the managers.

Objectives and Procedures

- The Investment objective of the Unitarian Universalist Common Endowment Fund (UUCEF) is to increase the asset base in order to maintain the real purchasing power of the endowment after distributions. Over a full market cycle the fund's return objectives, net of investment fees, are 8.5% nominal and 5.0% after inflation.
- To have a reasonable probability of achieving these return targets at an acceptable risk level the Investment Committee developed and adopted an asset allocation target for the UUCEF.
- The Investment Committee has appointed qualified investment managers to implement each component of the asset allocation policy.
- The Investment committee continually monitors the performance of the investment managers to insure that objectives are met and all guidelines and procedures are followed.
- All details of the UUCEF's objectives and procedures can be found in the "Unitarian Universalist Association Investment Guidelines and Procedures" document dated 10/19/03.

UUA Asset Allocation (3/31/09)

Target Allocation

Current Asset Allocation by Manager

Current Asset Allocation by Asset Class

* Manager weights include manager cash.
* Weights may not total 100% due to rounding.
