

Overthrow Corporate Capitalism

Whereas we as Unitarians assume leadership in defending human dignity and protecting our physical environment,

Because capitalism, by its design, requires the exploitation of classes of people and the earth's resources

And because wealth inequality has reached an historical extreme with its consequent violence, terrorism, wars, and racial oppression,

And because the exploitation of the environment is an existential threat to human beings,

And because corporate capitalists have demonstrated their inability and unwillingness to be responsible neighbors and stewards,

We commit to taking a leadership role in overthrowing corporate capitalism.
