Dear Congress,

Immigrant women and families can't wait 15 years to see a doctor.

We need real reform, not deals that leave some families behind. The proposed deal on immigration reform would force families—including pregnant women and children—to wait 15 years for health care. For a parent with cancer, or a sick child, 15 years could be the difference between life and death.

All families should have health care. Please support fair immigration reform for all people.

Sincerely,

Dear Congress,

Immigrant women and families can't wait 15 years to see a doctor.
